<b>Service Description</b>	Dance/Movement Therapy (DMT) is an innovative form of psychotherapy grounded in the mind-body connection and in the power of movement as communication. Dance/Movement Therapy works with the whole person integrating movement, creative process, and verbal communication. It has the potential to access emotions and issues that may be inaccessible in verbal therapy. In DMT, movement is used as a vehicle for self-expression, insight, and behavioral change in an affirming, non-judgmental environment. It is an effective treatment for people with psychological, social, developmental, neurological, and physical challenges.

<b>Service Description</b>	<p>Orion Family Services is a private, nonprofit organization which serves children, adolescents and families throughout Wisconsin. Orion's programs are dedicated to providing compassionate treatment services to troubled children and their families. Services include outpatient and in-home individual and family therapy to children, adolescents and families as well as a range of other critical outreach services. The Orion Intensive In-Home Family Therapy Program is designed for treatment of children and adolescents experiencing severe emotional, behavioral, and social difficulties within their home, school or community. Including families in treatment when working with children and adolescents is an approach that improves individual and family functioning. Although the identified client is the child or adolescent, the program's focus includes treatment that supports the family in resolving their difficulties. The philosophy of the program is that everyone in the family is responsible, but no one is to blame. Treatment emphasis is placed up on enhancing family strengths and supporting positive changes in the family system, to improve the overall functioning of the child. Therapists work with families to increase family cohesion and effective communication, and to create a supportive family environment where negative behaviors are reduced and positive behaviors increased. Parenting skills education is incorporated in treatment in either a formal curriculum-based approach (throughout Parent Skill-Builder Program) or informally as needed. For families impacted by trauma, we help healing occur through the use of trauma-informed treatment approaches such as Trauma-Focused Cognitive-Behavioral Therapy (TF-CBT). Orion has clinicians that have obtained advanced training in the utilization of this evidence-based and highly effective model for resolving trauma and reducing resultant emotional, behavioral, and interpersonal issues.</p>

<b>Service Description</b>	Triquestrian's mission is to provide the community with opportunities for growth and learning through the power of horses. We believe horses have the ability to help us experience and explore life from a unique perspective creating opportunities for growing, learning, and healing. All services at Triquestrian are provided utilizing the EAGALA (Equine Assisted Growth and Learning Association) Model. No riding is involved and no horse experience is needed. Equine Assisted Psychotherapy provides an experiential learning opportunity for participants. Because of its experiential nature, it allows a different level of exploration and integration of mind, body, and spirit that is often sometimes difficult to reach within traditional treatment settings. Equine Assisted Learning Services provide participants opportunities for problem solving, communication skill building, leadership training, and self-esteem building. All service can be uniquely tailored to meet the participants' goals.
