Service Description	<p>Frederick Harris has over 15 years in the field of behavioral health. His journey started working in the criminal justice system; where he served a diverse population comprised of substance abuse, mental health, homelessness, transitions, family dynamics, and criminal behavior. He has had great opportunities to develop restorative and rehabilitation programs, managed in-patient and outpatient programs for co-occurring disorders, and provided clinical therapy to adolescents and adults from all cultural and socioeconomic backgrounds. His direct, warm, and honest approach has been effective in building and maintaining therapeutic relationships.</p> <p>As an African-American, Frederick brings a deep understanding of multicultural, sexuality and other identity issues, where he offers multidimensional perspective and insights from different populations and personal life experiences. His clinical training includes an array of treatment modalities; which he finds to be important because his belief is that one single approach does not work for every individual. His eclectic style allows his clients to feel as though they are not just another person on a list of many, but rather an individual with concerns and issues that he can help them work through.</p>

Service Description	<p>Services for children, adolescents, and families include outpatient and in-home individual and family therapy to children, adolescents and families as well as a range of other critical outreach services.</p> <p>The Orion Intensive In-Home Family Therapy Program is designed for treatment of children and adolescents experiencing severe emotional, behavioral, and social difficulties within their home, school or community. Including families in treatment when working with children and adolescents is an approach that improves individual and family functioning. Although the identified client is the child or adolescent, the program's focus includes treatment that supports the family in resolving their difficulties. The philosophy of the program is that everyone in the family is responsible, but no one is to blame. Treatment emphasis is placed up on enhancing family strengths and supporting positive changes in the family system, in order to improve the overall functioning of the child. Therapists work with families to increase family cohesion and effective communication, and to create a supportive family environment where negative behaviors are reduced, and positive behaviors increased. Parenting skills education is incorporated in treatment in either a formal curriculum-based approach (throughout Parent Skill-Builder Program) or informally as needed. For families impacted by trauma, we help healing occur through the use of trauma-informed treatment approaches such as Trauma-Focused Cognitive-Behavioral Therapy (TF-CBT). Orion has clinicians that have obtained advanced training in the utilization of this evidence-based and highly effective model for resolving trauma and reducing resultant emotional, behavioral, and interpersonal issues.</p>
